Fan unit **SR 700**

Fan unit SR 700

The SR 700 System is a belt mounted Powered Air Purifying Respirator available with tight-fitting and loose-fitting head tops protecting against particles.

The SR 700 is a battery-powered fan that, together with particle filter SR 510 P3 R or SR 710 P3 R and an approved head top, is included in the Sundström fan-assisted respiratory protective device systems.

The SR 700 can be used as an alternative to filter respirators in all situations in which these are recommended. This applies particularly to work that is hard, warm or of long duration. The fan is equipped with filter, and the filtered air is fed through a hose to the human interface. The pressure then generated prevents surrounding pollutants from penetrating into the mask.

The SR 700 is ergonomically designed to fit the back and well-balanced. A wide range of accessories to find the best solution for your work environment and needs.

Features

- Well balanced with a superior ergonomic design
- Easy to use – the same control is used for starting, stopping and selection of operating status
- Optional belts or harness for a comfortable and stable fit
- Easily removable parts allow easy cleaning, maintenance and replacement
- IP67 certified electronics
- Automatic flow control to ensure the workers safety
- Alarm with audible/visual signals if the air flow is obstructed

Battery and charger design

- Easy replaceable Li-ion battery
- Two battery alternatives, i.e. STD (Standard 2.25 Ah) and HD (Heavy Duty 3.5 Ah)
- Operating time of up to 8 hours.
  The charging time for the Standard battery is around 2 hours and for the Heavy Duty battery, about 3 hours

Filters

- Use with two Sundström particle filters, SR 510 P3 R or SR 710 P3 R

Head tops

Choose a suitable headtop for your work and environment.

Loose-fitting head tops

SR 520 / SR 530

SR 561 / SR 562

SR 601 / SR 602

SR 570

SR 580

SR 592

Tight-fitting head tops

SR 200

SR 900
Use with singel or twin hose.
