

Assembling of SR700 charger in SR 506 EU charging station

Prepare the battery charger from SR700 for installation in the SR 506 EU charging station

Press down & push part **A** from the battery charger forward.

Connect the cable **B** to the battery charger connector **C** instead of part **A**.

Install the battery charger in the charging station, see the information below & the SR 506 operating instructions.

Insert the charging plug into the holes as shown in the pictures

Connect the cable B to battery charger. Place excess cable inside the charging station & place battery charger in the designated compartment
